

## Drowning - Detection

### News:

Drowning accident in the indoor-pool in Dinkelsbühl. Argusmatik demonstrated its ability to save a life. See more details under News.

Argusmatik: Automatic pool-surveillance for optimized security of swimmers.

Argusmatik assists you, the lifeguard and also the carrier of the bath, in achieving your responsible duty to assure swimmers security. Having Argusmatik installed in your pool, you use all technical possibilities to enable immediate reaction in critical situations and help in time.

Argusmatik is permanently present and gives you, the lifeguard, in case of emergency enough time to save a life and to avoid long lasting damages by applying life aid early enough.

Argusmatik AND qualified lifeguards assure optimized security in all pools.

For journalists and architects we established a new area. Here please find further information to facilitate your work. Please register for entry.
